

Architectural Resource and Adaptive Building Solutions, LLC

5

VIRTUAL GUIDED TOURS Fri., Sat. & Sun., October 16-18, 2020

The Architectural Resource team, lead by Architect Michael Klement, will present this home virtually in an immersive interactive model created by a 360 camera capture. This can be viewed on anything from a desktop computer to a smartphone. Joining open to all via Zoom. Tours will offer the opportunity for remote Q & A as well as breakout rooms to request an appointment to discuss your home.

'The 713 Project - For the Journey' is a showcase of advanced residential design, energy performance, healthy indoor environmental quality and sustainability. This home has been conceived from Architectural Resource's "Designed for Living" design philosophy, meaning it has created an idyllic environment for our clients, celebrating what brings them the greatest joy and happiness in life while allowing them to thoroughly enjoy their golden years together in a living space free of any physical impediments or constraints. It is registered with the USGBC with the certification goal of LEED for Homes Platinum pending- the highest level attainable. It is also designed to be a Net Zero Energy home, meaning this home produces all the energy it needs, including charging two electric vehicles, entirely from the sun! If you want a glimpse into what tomorrow's homes will look like, attend a virtual tour of this home. The Homes of the Future - TodaySM

Architectural Resource, Headed by Michael Klement, AIA, is a nationally recognized, award-winning, Ann Arbor-based architectural design firm specializing exclusively in residential design of new homes, cottages, additions, remodels, and renovations. Since the firm's inception in 1991, creating inspired buildings that are beautiful, durable, healthy, energy-efficient, and with a focus on sustainability has been the heartbeat of our mission.

Adaptive Building Solutions, LLC is an Ann Arbor, MI based Sustainable Green Building and Design company founded in 2006 by Mike Mahon. We are a custom home builder specializing in sustainable green building and design. Our corporate philosophy is deeply rooted in the fundamental concepts of environmental awareness and ecological preservation. ABS is noted for building healthy, high performance and durable, quality homes for their customers.
